SUSTAINABLE DEVELOPMENT GOALS

As one of Europe's leading parking service providers, Q-Park wants to demonstrate its contribution to the UN Sustainable Development Goals (SDGs).

Although Q-Park's business potentially has an impact on all 17 SDGs, we have identified three that align most with our business, strategy and objectives and where we believe we can make a difference. These are SDG 7 (Affordable, reliable, sustainable and modern energy), SDG 9 (Industry, innovation and infrastructure) and SDG 11 (Sustainable cities and communities).

Figure 15: Q-Park focuses on three SDGs: 7, 9 and 11

7 AFFORDABLE AND CLEAN ENERGY

taking action in accordance with their

respective capabilities.

Why are these SDGs significant to Q-Park?

With an increasing world population, greater numbers of people living in urban areas, and rising prosperity, urban infrastructure is becoming significantly more important.

One of the accompanying challenges for municipalities is to maintain a liveable city as they contend with a range of issues: congestion, search traffic cruising for a place to park, reduced accessibility, air pollution, as well as unattractive and unsafe streets and squares full of parked cars.

We have aligned our CSR strategy with the SDGs and identified the relevant sub-targets. The following table shows the relationship between the SDGs that are the most relevant for Q-Park and the company's contribution.

SDG Description Sustainable Development Goal Q-Park's activities and contribution

Affordable, reliable, sustainable and modern energy 7 7.2 By 2030, increase substantially the share Increasing renewable energy share in of renewable energy in the global energy consumption. Ī energy mix. Equipping car parks with solar panels, wind turbines and other means of generating renewable energy. Ī 7.3 By 2030, double the global rate of Focus on energy efficiency of equipment, installing LED improvement in energy efficiency. lighting and sensors, and other operational measures. 9 Industry, innovation and infrastructure 9.1 ı Develop quality, reliable, sustainable By offering attractive parking facilities we make urban and resilient infrastructure, to support amenities and essential amenities such as hospitals, economic development and human wellairports, universities and city centres accessible. being, with a focus on affordable and equitable access for all. ı 9.4 By 2030, upgrade infrastructure and Install LED lighting to reduce energy consumption. retrofit industries to make them Offer EV charging points to support the use of sustainable, with increased resource-use environmentally-friendly mobility options. efficiency and greater adoption of clean Provide parking near public transport nodes and bicycle and environmentally sound technologies parking solutions for 'last mile' needs. and industrial processes, with all countries We renovate, repurpose and upgrade existing parking

structures where relevant.
